- ▶ AbleTrend7.0 identifies trend direction by color: **Blue** for UP, **red** for DOWN, and **green** for SIDEWAYS.
- ▶ **STOPS** are indicated by small **red** and **blue** dots. The protective and follow up stops help you stay in the big move with a minimum risk, yet not get stopped out.
- ▶ The big **blue** and **red** dots are AbleTrend 7.0 **BUY** and **SELL** signals which scan and pin-point the best sweet spot entries automatically

I need to know:

- The trend changes for my stocks instantly
- How to validate a trading system
- How to place my stop to protect my position in volatile markets
- How to avoid "choppy" markets
- How to control my trading emotions
- How to simulate practice trades to gain experience and confidence
- How to tell the best entries after missing the big moves
- Why an 80% winning rate doesn't matter

*"I have found that the most important things in trading are 1. finding the trend early. 2. SUPPORT and RESISTANCE in real time and 3. entering on retracements, which is about controlling losses. Also, STAYING IN THE TREND. Your software shows me how to do these things with precise accuracy and elegant simplicity. The software you have developed has the most accurate support and resistance levels I have seen. They will indicate the pivots in advance, a feature that alone is worth the price."*

*"The AbleTrend system is phenomenal, it is a relaxing way to trade. I trade the ES, it shows me where to enter and where to place my stops Most days I place one or two trades, today, one trade profit of 33 pt. on ES. Nice for a 75 year old retired rancher. Thank you AbleSys."*
