

Instructions for Infinity/ Transact Futures Data

(Updated 8/10/2016)

Please make sure that your computer has all the most current Windows updates.

After installing AbleTrend, under the Choose Your Module box, select Infinity. On the Username and Password boxes, type in your Infinity/Transact username and password. Type in the word “live” on the Server box.

** If it's a Demo Infinity account, remove the word “live” from the Server box.

The screenshot shows a dialog box titled "Data Feed" with the following fields and options:

- Buttons: "Advanced" (selected), "Ok" (highlighted), "Cancel"
- Section: "Data Feed"
- Field: "Choose your module" with a dropdown menu showing "Infinity"
- Field: "Username" with placeholder text "(your Infinity or Transact username)"
- Field: "Password" with placeholder text "(your Infinity or Transact password)"
- Field: "Server" with the text "live" entered
- Field: "Port" (empty)

Note: This module may only get up to five days of historical data.

Symbol Format:

It uses the same format as Infinity and Transact.

(symbol)(month code)(year code)

Examples:

ESU6 = ES September 2016 contract

NQU6 = NQ September 2016 contract

Troubleshooting

1. If you're getting an invalid User or Password error message, most likely it is caused by typing in the incorrect username and password on the log-in screen or failure to type in live under the Server box if you're using a live account. If you do not know that information, contact Infinity or Transact.
2. Make sure that you have the Microsoft VC 10.0 Redistributable package (vcredist_x86.exe, version 10.xx). You may download that file from here, http://www.wintick.com/files/vcredist_x86_2010.exe
