Instructions for IQFeed Data
(Updated 12/1/2020)

1. Download and install the IQFeed Client:
   http://www.iqfeed.net/index.cfm?displayaction=support&section=download

2. Select the IQFeed data module and input your login credentials. If you do not see the data feed section of the login box, click the 'Advanced' button. Then select IQFeed from the dropdown menu:

3. IQFeed symbol formatting & guide can be accessed from the following link:
   http://www.iqfeed.net/symbolguide/index.cfm?symbolguide=guide&displayaction=support&section=guide&web=iqfeed

4. Symbol Format Basics:
   - US stocks symbols can be inputted directly, e.g. AAPL, IBM, JPM etc.
   - CME e-mini products start with @, followed by the symbol, the Month Code, and the 2 digit year. E.g. @ESH21, @NQH21, @RTYH21, @YMH21, @USH21
   - Replace the Month and Year code with "#" for Front Month (ie. @ES# instead of @ESH21).
   - Replace the Month and Year code with "#C" for Front Month back-adjusted history (ie. @ES#C instead of @ESZ15)
   - Product Trading on NYMEX and COMEX start with "Q", followed by the symbol, the Month Code, and the 2 digit year. E.g. QGC#, QCL#
