Quick Start AbleTrend 7.0

(Updated 3/14/2018)

1. Once the software is installed, open the AbleTrend software and you will see the login screen. Enter your email address, password, and product serial number (you will find your product serial number in your order confirmation email)

Login		X
	AbleSys	
Full e-mail Address	support@ablesys.com	
Password, same as Ablesys.com login		
Product Serial No	99999	
Save Passwords	(If this is checked, both passwords will be saved. If this is unchecked, both saved passwords will be cleared).	
Advanced	Ok Cancel	
	Data Feed	
Choose your module	AbleData	~
Username		
Password		

- 2. Data Feed Setup: We recommend first time users to use the AbleData connection, which is selected by default when you open the software. You may leave the Username and Password fields blank.
- 3. Click OK to log-in to the software. You should see three green boxes in the lower right corner: ABLE, HIS, and RT.

5. If there are windows that timed out or failed to populate, you can try right clicking on the window and clicking force refresh to reload the chart:

6. You'll see the active workspaces in the tabs along the bottom of the application

Major Markets Dy_Wk Stocks_Dy Wk Indices 1 Futures 1_3

These workspaces are provided as a starting point to using AbleTrend.

The Included Sample Workspaces

- 1. Major Markets Dy_Wk
 - This workspace features the Daily/Weekly Guidance chart for the major indices, as well as Treasury Bond futures, Gold futures, Crude Oil futures, and the Dollar Index
 - A dashboard like this can help you to see what is happening in some of the major markets and you can add to it up to 16 charts
- 2. Stocks_Dy_Wk
 - This workspace features the same Daily/Weekly Guidance, and can be used to stay on top of your portfolio holdings at a glance.
 - Maximize individual charts to get a larger view, or load another workspace to get details
- 3. AAPL_Swing
 - This workspace features all the time frames that might be relevant for this symbol
 - Use this workspace as a template and 'Save As' to reuse the template
- 4. Indices 1_3
 - This workspace features our 1 min/3 min Guidance configuration for day trading
- 5. Futures 1_3
 - This workspace features the same 1 min/3 min Guidance for E-minis and Futures

Modifying the Workspaces

1. Filling out your screen: The workspace templates may be saved to a different screen resolution than your own. To resize the charts in the workspace to fill your screen, click **Window** up at the top of the application & select **Vertical Tile**

- 2. Changing Symbols & Time Frames
 - For the selected chart, **right click** and then click **Format Symbol** or click the **S** icon on your toolbar:

Symbol \$SPX	Symbol SSPX	Format	Remove	Data	Range pdate
\$SPX) File	\sim		End Date	3/13/2018 ~
	Chart Style Style OHLC	Intraday	terval	 Start Date Or 	3/ 3/2018 ~
	Weight	O Weekly		O Days Back	1 Year 🔷 🗸
	Color 🗾	O Monthly	500	Apply to the	whole workspace
		○ Ticks	500	Marke	t Session
	Subgraph	S	ymbol	Open	00:00
	None (not display (or show))	Tick Size	0.0001 ~		
	● 1 ○ 2 ○ 3 ○ 4	Category	Forex 🗸	Close	00:00
ormat Sym	bol: \$SPX, 9-Min				
				Ok	Cancel

- Our sample workspaces are configured as **Guidance Charts**, which uses two time frames e.g. \$SPX is listed twice in the image above. (*The longer time frame is listed first*)
- To change the chart, we need to change both Sources
 - First click Format, then you can input a new Symbol or Interval
 - Then click **Format** again to save the change
- Next, select the second 'Symbol' in the left column to change the second time frame:

Symbol		S	Source	
\$SPX	Symbol \$S	PX	Format	Remove
\$SPX				
	S File			

- 3. A Short Cut for Changing Symbols
 - With a chart selected, you can make changes for symbols just by typing. As you type, a box will appear

4	\$SPX [3-M	lin]	×
	\$NDX		
	1 <u>C</u> hart	1 <u>F</u> rame	<u>A</u> ll Charts

- For Guidance Charts, click "1 Frame" in order to change both sources together
- 4. Adding Charts to your Workspace: You can load up to 16 charts in one workspace. The easiest method is to use an existing chart as a template by copy & pasting, and then changing the symbol or time frame
